

Quality, Safety and Security for Automotive Software-based Systems

Tenth VDA Automotive SYS Conference ▪ 16 - 18 June 2020 ▪ Potsdam

Register NOW!

Conference programme

The conference programme focuses on the quality, safety and security of electronics. The following topics will be addressed in different workshops and programme sessions running in parallel:

- Software/system quality assurance for future automotive systems
- Verification and validation
- Product safety/integrity
- Safety in automotive applications
- Standards and compliance in automotive applications
- Open source and cloud services
- Security in automotive applications
- Automated driving
- Artificial intelligence and machine learning in automotive applications
- Process assessment and improvements using Automotive SPICE® or other models
- Electrification of powertrain

The VDA Automotive SYS would greatly appreciate contributions for session talks and workshops related to the aforementioned topics. Please check the CALL FOR PRESENTATIONS for further detailed information:
