Product Safety and Conformity in the Automotive Industry

In May of 2020, the first PSCR Days Conference, which is hosted by the Association of the German Automotive Industry, will take place in Berlin, Germany. High-caliber keynote speakers, experts and managers from Product Safety, Legal Department, Regulatory Management, Product Safety and Conformity Authorities will be on hand to share their experience and knowledge.

Being up-to-date with the changes taking place in the development of mechanical and electromechanical systems, being prepared for risk-based approaches and gaining confidence in handling day-to-day liability-related decisions.

The conference will offer a platform where managerial and operational PSCRs can share and exchange information. Management principles relating to national and international product safety laws and automotive standards will be shared and supplemented with experiences relating to tools and methods for daily use.

The intention for launching PSCR Day

- ▶ The PSCR Days are an exchange platform for executive managers and PSCR's working in operations.
- ▶ PSCR tasks throughout the entire product life cycle and supply chain are taken into account.
- ▶ PSCR Days topic blocks:
 - ▷ Methods and tools (classic PSCR tasks in development and production)
 - ▷ In-house and inter-company information management (e.g. functional safety (ASIL) and PSCR PPM ratings, particular features, etc.)
 - ▷ New challenges (e.g. autonomous driving, SOTA/recall, PSCR tasks in block chain technologies, manipulation safety, etc.)
 - ▷ Liability issues (corporate and personal risks/exoneration options, etc.)
- ▶ The PSCR Days offer active PSCRs the opportunity to determine focus topics for the next PSCR Days agenda.

Agenda

Monday, 25 May 2020

8:30 am–8:45 am	Welcome	VDA QMC
8:45 am–9:00 am	Welcome – Topics of the day	Steering board PSCR
