

Qualification as Product Safety & Conformity Representative (PSCR)

Every company in the automotive supply chain is obliged to ensure the safety and compliance of its products. However, diversified markets, product variants and complex supply chains make these requirements difficult to navigate. If product safety and conformity are not ensured, this can threaten the very existence of the entire company. These challenges should therefore be addressed not only in relation to individual products, but systematically at organizational level – with a Product Compliance System (PCS).

Content of the Qualification:

- Seven elements of the PCS from Governance- and operational perspective
- Responsibilities of the PSCR and other roles within the PCS
- Regulatory requirements regarding Product Compliance
- Risk assessment methods and product deviations

You are due to be appointed as PSCR:

ID 534
„Product Compliance System (PCS)“
Duration: 4 hours

ID 503
„Product Safety & Conformity
Representative (PSCR)“
